

# SOLENOID VALVE

Solenoid valves are products for the control of hydraulic, pneumatic and electromechanical systems. The developed solenoid valve is used for the control of hydraulic pistons which adjust the actual leveling of artillery systems for stabilization.

## Technical Data

Conditions	Dimensions and Weight
Working Voltage: 48 ±6 V DC (Nominal)	Dimensions: Height: 114 mm Width: Ø 80 mm Depth : 121 mm
Operating Temp: -32°C ~ +44°C	
Storage Temp: -40°C ~ +60°C	Weight: 2.9 ± 0.2 Kg.
Qualifications	
Force: @ 10mm 300-400 N. (Pushing and Pulling)	Verify: MIL-STD-810G
Operating Conditions: Compatible with hydraulics defined by MIL-PRF-5606. Suitable to operate for dry-use
